

PROHIBITED EMISSIONS

040.060 SULFUR CONTENT OF FUEL

- A. Less than 250 million BTU per hour heat input:

It is unlawful for any person to sell or to burn, or cause to be burned, within the Health District at any time, fuels having a sulfur content in excess of the following amounts:

1. Solid fuels - 0.7% sulfur, by weight
2. Gaseous or liquid fuels - 1.0% sulfur, by weight

- B. For 250 million or more BTU per hour heat input the allowable emissions shall be calculated by use of the following formula:

$$Y = 0.105 X$$

Where X = maximum heat input, millions of BTU's per hour.

Y = allowable rate of sulfur emissions, pounds per hour.

- C. Fuels with sulfur contents exceeding the above limitations may be used if it can be shown that adequate sulfur removal equipment is present to limit the sulfur emissions into the atmosphere to the same degree as if fuels with the proper sulfur content had been used.
