*Notes:

1. Year 2000 figures represent actual population as of April 1, 2000 and are from the decennial census conducted by the U.S. Census Bureau. All other figures are estimates for July 1 of the respective year.
2. Washoe County estimated population is calculated by averaging the Nevada State Demographer's Labor Regression Model and Washoe County's Housing Unit Model. This average is then submitted to the Department of Taxation and certified by the Governor's office.
