

Bryce Fiorillo's Eagle Scout Project Presentation

Bartley Ranch Regional Park Clean Dog Dropping Containers

How the Idea for the Project Started

I started by going to Bartley Ranch and Meeting up with Ranger Red and Ranger Hartman. I asked if they had any projects they needed help with at the park that I could use for my Eagle Project. They said that there were clean dog dropping bag containers that had been there for a long time. The containers had become worn down and needed to be replaced.

Old Containers

New Design Requirements.

Together with Ranger Red and Ranger Hartman we discussed the design requirements that need to be durable and last a long time. So after a few design iterations We ended up with a prototype.

Dec 27, 2021, 11:58 AM

After the design was approved, Troop 15 got to work.

Once we were done building we had 12 containers.

Once we had all the containers we began installing them. We only had to install six out of the twelve boxes. We gave Ranger Red the remaining six to install at other parks.

Special thanks to:

- Ranger Red and Ranger Hartman for helping me coordinate and schedule the project.
- Western Nevada Supply for the pipe and the caps.
- Fast Signs for the stickers.
- And Troop 15 for their support and helping me build the containers. I couldn't have done it without them.
