# Pine Tree Nature Craft

Materials:

- Cardboard
- Rubber bands
- Scissors
- Pencil

Directions:

1. On your piece of cardboard, draw the shape of a pine tree.
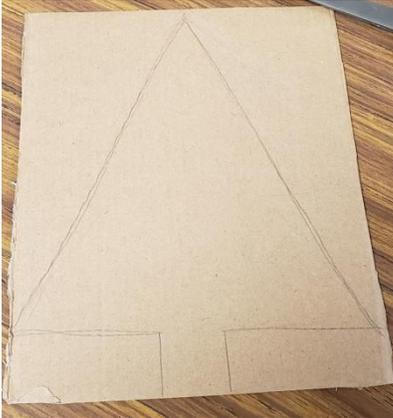

2. Cut out your pine tree.
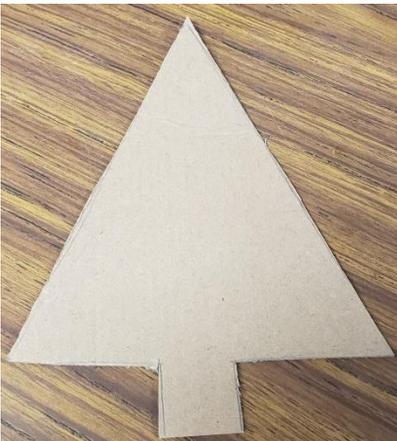

3. Cut tiny slits all over the tree. This is so the rubber bands can stay in place.

4. Wrap the rubber bands around the tree, placing them in the slits that have cut.

5. Go on a nature walk! Collect pieces of nature you find about the way and place them under the rubber bands so they will stay in place. Remember; only pick up pieces you have found on the ground! Don't pluck them off of the plants!

6. Now you have your own pine tree!
