

# WINDOW SPROUT HOUSE

## WHAT YOU'LL NEED:

- Sprout House PDF print off
- Sandwich bag
- Cotton balls or paper towels
- Seeds (bean seeds work really well for this)
- Water
- Tape

## INSTRUCTIONS:

1. Print off the Sprout House PDF outline. Color your sprout house and cut it out.
2. Get your cotton balls or paper towels wet and place inside of your sandwich bag. Place seeds inside of the bag on the wet cotton balls or paper towels. This will keep the seed moist and encourage it to sprout.
3. Tape the sandwich bag to the sprout house you colored and tape to a sunny window. Watch as your seeds sprout and grow!
